

Enrolyx — Business Requirements Document (BRD)**Version:** 1.0 | **Date:** June 15, 2026 | **Status:** Draft**1. Background and Purpose**

Enrolyx is an end-to-end enrollment management platform designed to serve educational institutions including universities, private colleges, coaching institutes, and K-12 schools. The platform manages the complete student enrollment lifecycle — from first inquiry through application, admission, and payment — while enabling data-driven decision-making and operational efficiency for enrollment and marketing teams. Enrollment management at most institutions today is fragmented across spreadsheets, disconnected CRM tools, and manual follow-up processes. Counselors spend time chasing leads across multiple systems rather than engaging prospects. Managers lack real-time visibility into pipeline health and team performance. Applications are tracked in emails and shared drives, creating errors and delays.

Enrolyx addresses these gaps with a unified platform structured across three phases. Phase 1 establishes the core operational foundation: Enrollment Cloud, Education CRM, Application Management, Payment & Finance, Engagement & Communication, and Analytics. Phase 2 extends the platform with enterprise-grade integrations, campaign management, and governance tools. Phase 3 introduces an AI and science-based intelligence layer for prospect scoring, program recommendations, and predictive analytics.

This BRD serves as the source of truth for engineering, design, QA, and program management teams throughout the development lifecycle.

2. Scope**In-Scope**

Dimension	Details
Institution Types	Universities, private colleges, coaching institutes, K-12 schools
Phases	Phase 1 (Core Foundation), Phase 2 (Extended Ecosystem), Phase 3 (AI Intelligence)
Platform	Web application (desktop + mobile-responsive); native mobile app in Phase 2
User Types	Enrollment counselors, marketing executives, admissions managers, system admins, institutional heads
Geographies	Multi-country; currency and locale configurable
Channels	Email, SMS, WhatsApp, Messenger, web forms, walk-in, social (Phase 2+)

Out of Scope

Item	Notes
LMS content delivery functionality	Integration only; content delivery is out of scope
SIS core administration modules	Integration only; SIS administration is out of scope
Native mobile app (iOS/Android)	Phase 2; mobile-responsive web delivered in Phase 1
Payment gateway infrastructure hosting	Third-party gateway integration only; gateway TBD (see Open Issues)
AI model training infrastructure	Phase 3; third-party ML services to be evaluated

25 **3. Schedule and Phases**

Milestone	Target Date	Scope
Development Kickoff	June 15, 2026	Architecture finalized; Sprint 1 begins
Phase 1 — P0 (MLP) Launch	August 15, 2026	CRM, enrollment pipeline, application management, user/RBAC, basic dashboards, audit log
Phase 1 — P1 Complete	September 30, 2026	Payment integration, omnichannel communication, full workflow automation, reconciliation
Phase 2 Kickoff	October 1, 2026	SSO/integrations, campaign management, performance & governance
Phase 2 Launch	December 31, 2026	Full enterprise-ready, connected platform
Phase 3 Kickoff	January 2027	AI/ML intelligence layer begins
Phase 3 Launch	June 30, 2027	Prospect intelligence, recommendation engine, predictive analytics

26  **Risk Note:** Full Phase 1 scope spans 25+ features across six capability areas. With three engineers
 27 and eight weeks, the P0 scope has been intentionally narrowed to the MLP. See Open Issues OI-2 for
 28 details.

29
30 **4. Business Requirements**31 **4.1 Functional Requirements**32 **Enrollment Cloud & CRM**

#	Epic	User Story	Acceptance Criteria	Phase	Notes
1	Enrollment Cloud	As a counselor, I need to manage prospects through pipeline stages	Configurable stages; stage history logged; bulk stage updates supported	P0	Core admissions flow
2	Enrollment Cloud	As an admin, I need to create and manage multiple simultaneous intakes	Multiple active intakes supported concurrently; prospects assigned per intake; intake status on dashboard	P0	Including same-program parallel intakes
3	CRM	As a marketing executive, I need to capture leads	Auto-populate from web forms, manual entry,	P0	Web, walk-in, campaigns, partners

		from all channels into one system	CSV import; source tagged on each lead		
4	CRM	As a manager, I need leads automatically assigned to counselors via configurable rules	Round-robin, territory, and program-based assignment rules; unassigned queue visible	P0	Required for engagement
5	CRM	As a counselor, I need to view the full interaction history per prospect	Timeline showing calls, messages, emails, status changes, and notes per prospect	P0	
6	CRM	As an admin, I need to define custom prospect profile fields	Admin can add/edit/delete custom fields (text, dropdown, date, file); fields appear on profile forms	P0	Flexibility requirement

33 Application Management

#	Epic	User Story	Acceptance Criteria	Phase	Notes
7	Application	As an admin, I need to build custom application forms per program	Drag-and-drop form builder; field types include text, file upload, dropdown, date; forms are program/intake-specific	P0	Core application system
8	Application	As a prospect, I need to upload and submit required documents	File upload with type/size validation; upload status visible to counselor	P0	
9	Application	As a counselor, I need applications to move through automated workflow stages	Workflow stages defined by admin; transitions trigger notifications; status visible on dashboard	P0	
10	Application	As an admin, I need multi-	Prospect can apply to multiple	P0	

		program and multi-campus application support	programs; each application tracked independently		
11	Application	As an admin, I need document validation rules per program	Specific document types required per program/intake; missing docs flagged automatically	P1	
12	Application	As an admin, I need program-specific application requirement checklists	Checklist configurable per program; requirements shown to counselors and prospects	P1	

34 **Payment & Finance**

#	Epic	User Story	Acceptance Criteria	Phase	Notes
13	Finance	As an admin, I need to define fee structures per program and intake	Fees configurable by program, intake, campus, and student category; multi-currency supported	P1	Gateway dependency
14	Finance	As a prospect, I need to pay fees online via multiple methods	Payment gateway integration (TK); supports cards, bank transfer, UPI, wallets	P1	Gateway TBD — see OI-1
15	Finance	As a counselor, I need automated payment reminders sent to prospects	Reminders at configurable intervals via email and WhatsApp; reminder log per prospect	P1	
16	Finance	As a finance manager, I need to track and reconcile all transactions	Transaction dashboard with status; CSV export; reconciliation report	P1	
17	Finance	As an admin, I need installment/EMI	EMI plans configurable per program; due dates and	P2	Finance flexibility

		payment plan configuration	amounts defined; auto-reminders per installment		
--	--	----------------------------	---	--	--

35 **Communication Suite**

#	Epic	User Story	Acceptance Criteria	Phase	Notes
18	Communication	As a counselor, I need to send messages via WhatsApp, Email, and SMS from one interface	Unified compose window with channel selector; delivery status shown	P0	Core outreach
19	Communication	As an admin, I need to create message templates per channel	Template builder for Email, WhatsApp, SMS; variable substitution supported (name, program, date)	P0	
20	Communication	As a counselor, I need a complete communication log per prospect	Log shows channel, timestamp, message content, and delivery status	P0	
21	Communication	As a prospect, I need to manage my communication consent preferences	Opt-in/opt-out per channel; consent recorded with timestamp; non-consented channels blocked	P1	Legal requirement
22	Communication	As an admin, I need to configure SLA response time targets	SLA targets configurable by channel and stage; overdue items flagged on dashboard	P2	

36 **Analytics & Reporting**

#	Epic	User Story	Acceptance Criteria	Phase	Notes
23	Analytics	As a manager, I need a dashboard showing pipeline health and team performance	Configurable date range; metrics include total leads, conversion rate, stage distribution, counselor performance	P0	Basic visibility

24	Analytics	As a manager, I need campaign performance tracking	Leads by source and campaign; cost-per-lead where budget data is available	P1	
25	Analytics	As an executive, I need advanced dashboards with funnel optimization insights	Predictive funnel analytics; drop-off analysis; anomaly detection	P2	Phase 2

37 **Metadata & System Configuration**

#	Epic	User Story	Acceptance Criteria	Phase	Notes
26	Academic Setup	As an admin, I need to configure intakes, programs, specializations, and campuses	Hierarchy: Institution > Campus > Department > Program > Intake; all modules reference this structure	P0	Foundation for all modules
27	User Management	As an admin, I need to create users and assign roles with defined permissions	User CRUD; roles configurable with granular permissions; changes take effect immediately	P0	Security critical
28	Workflow	As an admin, I need to define workflow stages, tasks, and automation rules	Trigger/action rules configurable (e.g., "when stage = X, send message Y"); task assignment by rule	P0	Backbone of system
29	Compliance	As an admin, I need all user actions logged in an audit trail	All create/update/delete actions logged with user, timestamp, before/after values; searchable by admin	P0	Must-have for tracking
30	Integration	As an admin, I need SSO configuration for enterprise institutions	SAML, OAuth, and LDAP supported; SSO configurable per institution	P2	Enterprise requirement

38

39 **4.2 Non-Functional Requirements**40 **Accessibility**

#	Requirement	Acceptance Criteria	Phase
---	-------------	---------------------	-------

NF-1	WCAG 2.1 AA compliance	Screen reader compatibility; keyboard navigation; sufficient color contrast	P0
------	------------------------	---	----

41 **Latency, Loading & Error States**

#	Requirement	Acceptance Criteria	Phase
NF-2	Page load time	All primary views load within 3 seconds on standard broadband	P0
NF-3	API response time	95th percentile API response under 500ms	P0
NF-4	Error states	All error states display user-friendly messages; errors logged to observability system	P0

42 **Metric & Logging Requirements**

#	Requirement	Acceptance Criteria	Phase
NF-5	User action logging	Logs include user ID, action, timestamp, entity affected; retained per data retention policy	P0
NF-6	System health monitoring	CPU, memory, error rates, and request latency tracked via observability tooling (TK)	P0

43 **Security & Privacy**

#	Requirement	Acceptance Criteria	Phase
NF-7	RBAC enforced across all modules	Users cannot access data or actions outside their role permissions	P0
NF-8	Encryption at rest and in transit	TLS 1.2+ for all API communication; AES-256 for stored PII	P0
NF-9	GDPR compliance	Data retention policies configurable; consent management supported; right-to-delete implementable	P1
NF-10	SOC2 readiness	Access logs, audit trails, and security controls documented	P2

44 **Test Coverage & Pipeline Readiness**

#	Requirement	Acceptance Criteria	Phase
NF-11	Unit test coverage	Minimum 80% coverage on all new services	P0

NF-12	Integration tests	All critical user flows covered by automated integration tests	P0
NF-13	CI/CD pipeline	Automated build, test, and deploy pipeline operational before Phase 1 P0 launch	P0

45

46 **5. Metrics and Success Criteria**

KPI	Definition	Target	Phase
Lead-to-enrollment conversion rate	% of leads that result in confirmed enrollment	TK — baseline established in Phase 1	Phase 1
Counselor first-contact time	Average time from lead capture to first counselor contact	< 2 hours	Phase 1
Application completion rate	% of started applications that are submitted	TK	Phase 1
Payment collection rate	% of confirmed admissions completing fee payment within 7 days	TK	Phase 1
Platform uptime	System availability	≥ 99.5%	Phase 1
Campaign ROI	Revenue attributed to campaign / campaign cost	TK	Phase 2
Prospect score accuracy	% of high-scored prospects that convert (AI model validation)	TK	Phase 3

47

48 **6. Open Issues / Decisions Log**

#	Issue	Owner	Status	Notes
OI-1	Payment gateway vendor selection	TK	Open	Razorpay, Stripe, and PayU to be evaluated; must support multi-currency
OI-2	August 15 P0 scope risk	PM	Open	Full Phase 1 in 8 weeks is aggressive for 3 engineers; recommend narrowing P0 to CRM + enrollment pipeline + application + user management
OI-3	WhatsApp Business API account setup	TK	Open	Requires Facebook Business Manager verification; lead time TK — initiate immediately

OI-4	GDPR applicability	TK	Open	Confirm whether institutions operate in EU jurisdictions before scoping consent management
OI-5	AI/ML platform selection (Phase 3)	Architect	Open	Evaluate AWS SageMaker, Azure ML, and third-party vendors
OI-6	SSO implementation priority	Architect	Open	SAML vs. OAuth vs. LDAP priority to confirm with first enterprise client
OI-7	Data retention period	TK	Open	Default to 7 years; confirm per applicable jurisdiction
OI-8	Go-to-market pilot institution selection	PM	Open	Recommend piloting with 2–3 institutions (one university, one coaching institute) before GA

49

50 **7. Stakeholders and Responsibilities**

Role	Alias	Allocation	Responsibilities
Product Manager	TK	50%	Requirements ownership, sprint planning, stakeholder communication, acceptance sign-off
Architect	TK	20%	System architecture, technology decisions, Phase 2/3 technical planning, engineering unblocking
Engineer 1	TK	100%	Backend: CRM, Enrollment Cloud, Workflow Engine
Engineer 2	TK	100%	Backend: Application Management, Payment & Finance, Communication integrations
Engineer 3	TK	100%	Frontend, dashboards, admin configuration, metadata management UI

51

52 **8. FAQs**

Q: Why is Phase 1 split into a P0 (August 15) and P1 (September 30)? Full Phase 1 scope spans six capability areas with 25+ features. Three engineers cannot deliver this in eight weeks without quality risk. P0 prioritizes the features institutions need to begin operating. Payment integration and omnichannel communication require third-party dependencies and additional lead time, making September 30 more realistic.

Q: Can Phase 2 begin before Phase 1 P1 is fully complete? Yes. SSO and integration architecture design can begin in parallel during September while Phase 1 P1 development completes. Full Phase 2 engineering sprint capacity starts October 1.

Q: How does Enrolyx differ for a university vs. a K-12 school? The platform is metadata-driven and configurable. A university may manage hundreds of programs across multiple campuses with complex intake cycles, while a K-12 school manages grade-based admissions with simpler workflows. Both use the same platform; the difference is in how metadata (programs, stages, forms, fee structures) is configured per institution.

9. Appendix

Glossary

Term	Definition
MLP	Minimum Lovable Product — the minimum scope delivering a complete, usable experience
RBAC	Role-Based Access Control
SIS	Student Information System
LMS	Learning Management System
EMI	Equated Monthly Installment
SSO	Single Sign-On
SAML	Security Assertion Markup Language
UTM	Urchin Tracking Module (URL campaign tracking parameters)
UKB	Universal Knowledge Base
GDPR	General Data Protection Regulation
SOC2	Service Organization Control 2 (security compliance framework)
P0	Minimum Lovable Product; will not launch without this
P1	High priority; ship shortly after initial launch
P2	Nice-to-have; long-term roadmap
